ANIKET JADHAV

Senior Frontend Engineer | React.js · Next.js · TypeScript | Scalable Web Applications

8178990405 janiket112@gmail.com linkedin.com/in/aniket-jadhav-847151157 Portfolio Pune, India

Professional Summary

Senior Frontend Engineer with 4+ years of experience architecting and delivering scalable, high-performance web applications using React.js and Next.js. Deep expertise in SSR, SSG, and ISR rendering strategies, performance optimisation (Core Web Vitals, Lighthouse scoring, CDN/caching), and reusable component architecture at enterprise scale. Experienced in Vercel deployments, Nx monorepo workflows, and leading frontend engineering in Agile cross-functional teams. Passionate about clean code, measurable impact, and building production-grade UI systems.

Technical Skills

Frontend: React.js, Next.js (SSR / SSG / ISR / Server Components), TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling: Tailwind CSS, Shadcn UI, Material UI, Bootstrap, Sass

State Management: Redux, Redux Toolkit, Context API

Performance: Core Web Vitals, Lighthouse optimisation, code-splitting, lazy loading, CDN/caching strategies, image optimisation

Deployment & DevOps: Vercel (deployments, environment config, serverless functions, edge runtimes), CI/CD basics, Git, GitHub, Bitbucket

Architecture: Nx Monorepo, Micro-frontend patterns, Component-Driven Development

Backend & APIs: Node.js, Express.js, MongoDB, RESTful APIs, JWT, OAuth (Google Login)

Database: MongoDB (NoSQL), MySQL / PostgreSQL basics (SQL), database integration strategies

Testing: Cypress (E2E), React Testing Library, Jest, Unit & Integration Testing

Security: XSS prevention (input sanitisation, CSP), CSRF protection (token-based, SameSite cookies), secure auth (JWT, OAuth)

Tools: Jira, Storybook, CI/CD basics, Agile/Scrum

Work Experience

Software Analyst · Senior Frontend Engineer Dec 2024 – Present

Amicus Global Inc. / Pune, India

- Architected and delivered reusable, scalable UI components in a Next.js Nx monorepo for a US-based enterprise client, enabling multiple teams to ship features faster through shared component libraries.
- Implemented SSR, SSG and ISR rendering strategies in Next.js to improve page performance and SEO, contributing to measurable Lighthouse score improvements across key product flows.
- Led performance optimisation efforts: applied code-splitting, lazy loading, and image optimisation, reducing bundle sizes and improving Core Web Vitals (LCP, CLS, FID) across the platform.
- Deployed and managed Next.js applications on Vercel, including environment configuration, build optimization, and monitoring
- Improved Lighthouse performance score from 70 to 90+ through optimization techniques
- Enforced frontend best practices, TypeScript conventions, and coding standards; authored internal documentation that reduced onboarding time for new engineers.
- Mentored junior developers and led code reviews, maintaining high code quality and fostering a learning-focused engineering culture.
- Built and maintained comprehensive component documentation in Storybook, improving design-to-engineering handoff and collaboration.
- Developed E2E and component tests using Cypress and React Testing Library, achieving high test coverage for reliable, regression-free releases.
- Collaborated in Agile sprint planning and delivery, consistently meeting sprint commitments on a complex enterprise platform tracked via Jira.

Associate Technology · Frontend Lead Jan 2023 – Dec 2024

TechChefz (TCZ Digital Pvt. Ltd.) | New Delhi, India

- Built and deployed production-grade React.js and Next.js applications leveraging SSR and SSG for dynamic and static content, improving page load performance by 20% and boosting user retention by 15%.
- Implemented code-splitting, lazy loading, and advanced caching strategies that reduced LCP and improved overall Lighthouse performance scores across multiple client projects.
- Architected scalable Redux state management and migrated key flows to Context API, improving maintainability and reducing unnecessary re-renders.
- Implemented JWT-based authentication and OAuth (Google Login); applied XSS prevention (input sanitisation, CSP) and CSRF protection, reducing security vulnerabilities by 30%.
- Mentored junior developers in React.js and Next.js best practices, achieving a 30% improvement in task completion rate and a 40% reduction in post-release bugs through rigorous code reviews.
- Introduced Git Flow branching strategies that reduced merge conflicts by 25%, improving overall team velocity.
- Designed fully responsive interfaces using Tailwind CSS, Shadcn UI, and Material UI, increasing client satisfaction scores by 25%.

Senior Software Developer Apr 2022 – Dec 2022

Advanced Structures India | Bengaluru, India

- Developed high-performance frontend features for the XCPEP SaaS platform using React, TypeScript, Redux, and Material UI, serving enterprise clients at scale.
- Served as Subject Matter Expert (SME) for frontend modules; implemented module-wise and role-based permission handling for secure access control.
- Reduced bug reports by 20% by enforcing TypeScript best practices and performance patterns, improving component render efficiency.
- Contributed to Agile ceremonies including sprint planning and user story definition to improve delivery accuracy.

Software Developer Sep 2021 – Mar 2022

Advanced Structures India | Bengaluru, India

- Contributed to frontend development of the XCPEP platform, building UI components and supporting feature rollouts.
- Assisted in code reviews and testing efforts to ensure consistent code quality across the codebase.

Frontend Developer Jul 2021 – Sep 2021

StockPe | New Delhi, India

- Developed responsive React.js UI components for a fintech platform, focusing on performance and mobile-first design.
- Collaborated with design and backend teams to rapidly deliver product features in a fast-paced startup environment.

Frontend Web Developer Jan 2021 – Jun 2021

SabPay | Noida, India

- Built and maintained responsive web interfaces using HTML, CSS, JavaScript, and React.js for a fintech payment product.
- Integrated backend APIs to implement payment flows and ensure smooth cross-device user experience.

Education

B.Sc. Computer Science Jul 2018 – Jul 2021

Deshbandhu College, University of Delhi

CBSE 12th Boards 2016 – 2018

The Adarsh School
